

Kaba Mas X-10 and S&G 2740B Neutralization

This 2 day course will show the student how to properly plan an attack on a GSA container and make an FS-809B approved, Method 1 opening. This course will specifically target current production FF-L-2740B locks, to include the Kaba-Mas X10 and the S&G 2740B. During the course, students will learn approved opening methods, manufacturer approved drill points, hard plate types, drill bit options, tool and equipment options, and other drill related criteria.

Who Should Attend:

Any technician that desires the skills to drill approved FF-L-2740B locks

Subjects Covered:

- Approved opening methods of FF-L-2740B locks
- Manufacturer drill points
- Hard plate types
- Drill bit, tool and equipment options

Course Length - 2 Day

Course Tuition - \$1,150.00

Course Dates

April 27th - 28th, 2015

August 24th - 25th, 2015

Objective

Students will leave the class with the knowledge and skill to open FF-L-2740B approved locks using FS-809B, Method 1 opening.

Course Benefits

LSI Diploma

1st Class of its Kind!

Lockmasters is proud to introduce the first ever Kaba Mas X-10 and S&G 2740B Drilling Class. Students will learn how to properly plan an attack using our new re-designed drill templates and make factory authorized FS-809B-Method 1 neutralizations on locked up GSA Containers.
