

### Automotive Opening

#### Course Objective

Students will use vehicle make and model or VIN number information to quickly research specific opening techniques for a target vehicle. Using the methods and tools discussed in class, students will be given the opportunity to open vehicles in the parking lot while in an instructional environment. Instructor(s) will work with students one-on-one, laying out an opening plan for a target vehicle and overseeing the successful opening.

This class is a six hour introduction to vehicle openings. The featured tool kit for this class is the Tech Train Quick Entry Master Locksmith Automotive Opening Kit. Students will have the ability to purchase the kit in conjunction with the class and use the kit during the hands-on portion of the class. Students who have already purchased a kit, no matter the manufacturer, are encouraged to bring their kit with them. Topics covered will include electronic door locks with automatic relocking, indexing and laminated glass precautions, door linkage styles, proper use of air bag and reach tool, jiggler and pick key use, and instruction manual comprehension.

**Course Length - 6 Hours** (Saturday during the Professional Locksmith schedule)  
**Course Tuition with Tool Kit - \$495    Without Tool Kit - \$200**

**Prerequisites: None**

#### Course Equipment

Tool Options:

- Purchase kit with tuition
- Use our kit
- Bring an equivalent kit
