

Door & Lock Entry Techniques (Pro Lock 3)

This 5 day course provides the students with the tools and knowledge necessary to surreptitiously, covertly and with some forced entry techniques defeat locking systems. Through lecture and laboratory participation, this course examines a variety of pin tumbler, wafer and combination locks.

Students will learn picking skills, lock impressing skills, combination lock manipulation skills, key clamming skills, bypass skills and more.

Who Should Attend

The ideal students for this training are those that are looking to gain knowledge and proficiency with alternate entry techniques:

Law Enforcement, Military Police, Special Ops, Experienced Locksmith or those organizations wanting to train their Security Staff to inspect their own security for unauthorized entry or egress. These individuals may be: Facility Security Officers, Security Managers, Security Consultants who have general locksmith experience.

Due to the nature of this course, some applicants may not be permitted enrollment.
