

# GSA Authorized Safe & Vault

## T E C H N I C I A N

Course # LSI130

With over 380,000 GSA containers in use today, this is an ideal course for U.S. military, government & commercial locksmith. In GSA Authorized Safe & Vault Technician Training you will learn all the skills required to service and maintain GSA approved security containers.

### COURSE DESCRIPTION

This comprehensive course will give you hands-on instruction on the approved methods of servicing, installing, diagnosing, troubleshooting, repairing and certifying GSA: Locks, Vaults & Containers. You will also learn the proper means to perform covert and forced entry into GSA Containers.

The General Services Administration (GSA), in conjunction with the Inter-agency Committee on Security Equipment (IACSE), Storage Equipment and Locking Systems (SEALS) Subcommittee, oversees the GSA courses taught at LSI. The objective of the GSA program is to establish standards of training, and to certify those students who meet those standards.

"Aloha, I attended the GSA Safe and Vault tech training in May. It was excellent and I learned a lot of stuff that is useful to me now, on Kwajalein. Attending this course also has a dark side...it created a whole lot of work for me! I will see you guys again in 3 years for the recert." - Les

### COURSE HIGHLIGHTS

- Security Information Program Specifications, Policy and Guidance: Federal, Military, DOE, NISPOM and DoD
