

Professional Locksmithing

Course # LSI150

LSI's ProLock course is ideal for individuals who have never had formal locksmith training or for those who are interested in making a career change into a more economically secure industry.

COURSE DESCRIPTION

10-day hands-on.

The training in this course will provide you with the skills necessary to become a competent technician who can service, install, troubleshoot and masterkey most commercial, industrial and residential key lock systems. You will learn by-pass techniques used in the field by the professionals to defeat most key lock systems, which will give you an understanding of lock capabilities and vulnerabilities. These techniques and skills include lock picking, lock impressioning, lock bumping, and tool specific lock by-pass.

COURSE TOPICS

- Lock terminology
- Key blank identification
- Key duplication and code cutting
- Cylindrical lockset identification, installation and service
- Mortise lockset identification, installation and service
- Lock designs and functions
- Master keying pin tumbler cylinders

- Americans with Disabilities Act (ADA)

"I am currently taking the Professional Locksmithing course at L.S.I. The facility and staff are great an the hands-on training is extremely helpful. The knowledge I will have will give me the opportunity to work as certified locksmith when I go home. I feel the trip to Nicholasville was well worth it. Hey Ladies!!!.....even women can be locksmiths." - Christa

Course Credentials include an LSI Diploma and Kaba Unican Certification. ASSA High Security Certification is optional
